Personal Profile

A passionate Computer Science and Design undergraduate seeks to build expertise in Data Science and AI apart from further deepening knowledge in Security through hands-on academic and industry experience. Has a proactive mindset and a genuine eagerness to make a positive difference, thriving in collaborative and diverse team environments. Seeks to deliver meaningful contributions while embracing every opportunity to learn and grow in both academic and professional settings.

Education

Bachelor of Engineering in Computer Science and Design, Honours — Singapore
Singapore University of Technology and Design (SUTD) — *Aug. 2024 – Present*
- Focus Track: Security & Visual Analytics and Computing
- Minor of Interest: Design and Artificial Intelligence
- Date of Graduation: Aug 2028

Diploma in Cybersecurity and Digital Forensics — Singapore
Temasek Polytechnic — *Apr. 2020 – May 2023*
- Elective Cluster: Digital Forensic (Mobile Digital Forensics and Malware Analysis)
- Modules Taken: Data Structure and Algorithm, Database Application Development, Data Visualisation and Analytics

Experiences

IT Intern — May 2023 – June 2023
DataExpert Singapore Pte Ltd — *Singapore*
- Assisted in data recovery, digital forensics, and technical troubleshooting with vendors and clients.

Intern – Information Security and Digital Forensics — July 2022 – Dec. 2022
TRS Forensics Pte Ltd. — *Singapore*
- Collaborated closely with the Data Protection Team to provide advisory services support clients in meeting regulatory and cybersecurity compliance requirements.
- Reviewed and evaluated client cybersecurity programs, performed technical assessments to strengthen resilience, and participated in cybersecurity incident response and digital forensics investigations.

Personal & Academic Projects

Web News Crawling and Retrieval Engine | *Python, Scrapy, Bash Script* — Mar. 2026
- Developed a Scrapy crawler to collect and export posts details from *news.ycombinator.com* within user-defined time range.
- Built an inverted index search engine with multi-keyword retrieval, cross-file de-duplication and BM25 relevance ranking across scraped datasets.
- Automated scraping and retrieval pipeline via a Bash script with interactive user prompts.

My Buddy Companion | *Python, Audrino* — Nov. 2025
- Developed an AI emotional-support assistant using face/voice emotion detection and Flutter front-end.
- speech-to-speech conversational system with facial expression-based emotion detection and adaptive stress-relief responses integrated into a smart pillow

SUTD - Prediction on Mortality Rate | *Python* — May 2025 – Aug. 2025
- Pre-trained supervised learning models to predict infant mortality rates to 2040.
- Implemented Ridge/Lasso/Linear Regression dashboard with coefficients, predicted vs actual graphs, MSE/R^2 metrics.
- Added policy recommender, scenario builder sliders for instant country-specific predictions using Streamlit front-end.

Co-Curricular Activities

President — March 2025 – March 2026
SUTD Taekwondo Club — *Singapore*
- Led club operations, represented the club in official meetings, and coordinated with management.
- Conducted training sessions while ensuring compliance with finance and risk guidelines.

Technical Skills

Languages: Java, Python, SQL (Postgres), JavaScript, HTML/CSS, PHP
Developer Tools: Git, Bash Script, Visual Studio, Android Studio
Libraries: NumPy, Matplotlib, TensorFlow, Scrapy, Pandas
Others: Data Analysis and Engineering, Web-based Penetration Testing, Website and App Development
